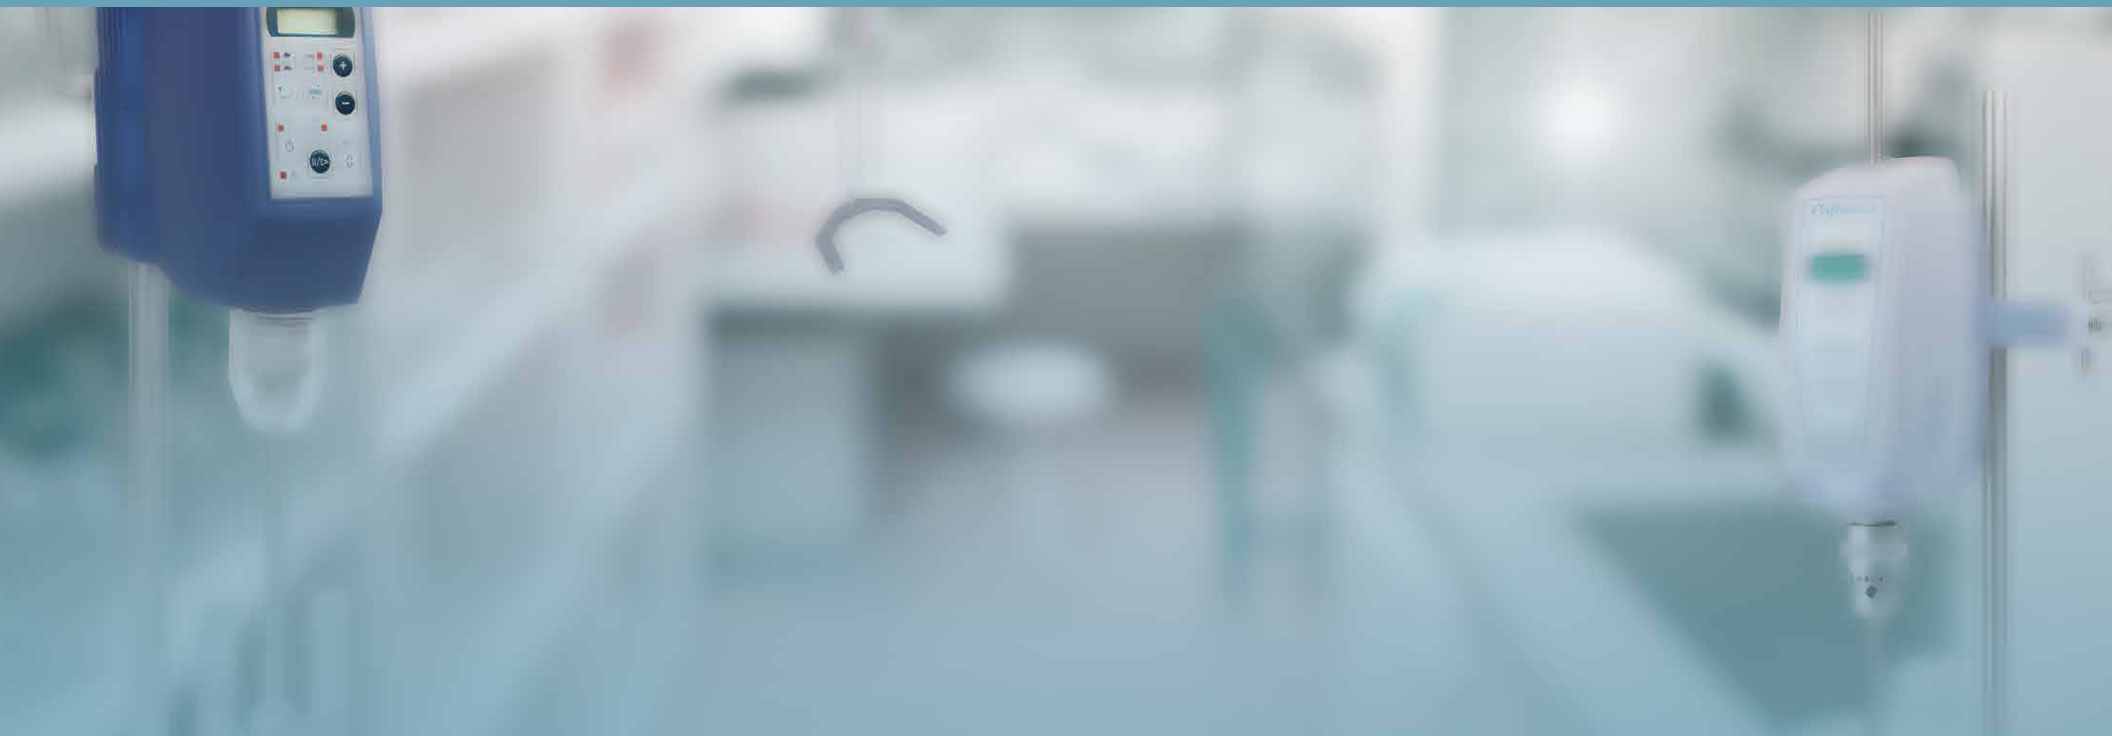
Stirrer Guide

Caframo®

LabSolutions



Caframo LabSolutions

Laboratory Overhead Stirrers

- Immediate customer service and technical application support
- In stock quality product; Orders ship one day after receipt
- Manufactured in North America; Shipped Worldwide
- 3 Year Warranty
- Safety Certified to Applicable Standards

"Thanks for the quick and helpful follow up. I appreciate the personal service."

"The motor just won't burn out. It runs 24/7!"

Torque Ncm (in-lb)	565 (50)	339 (30)	170 (15)	90 (8)	70 (6)	10 (1)
Horsepower	1/5	1/5	1/5	1/15	1/18	1/100

All stirrers available in 120 and 220 volts.

Caframo LabSolutions

Stands

- Solid cast base, coated with chemical resistant epoxy
- Largest base accommodates hotplate or large vessels; Leveling knobs provide added adjustability
- Compact base maximizes bench space and fits into smaller enclosed work stations or hoods

Clamps

- Securely hold a large portion of the stirrer support rod maximizing stability
- Multipurpose - also used with chain or extension clamps to hold accessories

What do you know about FLOW?

Axial	Radial	Tangential
		Fluid is pumped downward or upward - ideal for liquid/solid mixing, suspending solids, blending or draw down (introducing air- vortexing). Best suited for low viscosity, high speed mixing.	Fluid flows from the top and bottom with higher shear and turbulence and lower pumping - ideal for liquid dispersion. Best suited for medium viscosity fluids and high speed applications.	Fluid moves in a swirling motion often with a surface vortex - ideal for high viscosity fluids at lower speeds. Paddle diameter can be close to the diameter of the vessel and provides a large surface area to contact product.
